

PRODUCT END OF LIFE

Approach

Human Active Technology is committed to the minimizing of waste and reduction of environmental impact. Through a set of evolving practices and policies, we work hard to create high quality, long lasting products while ensuring the safety of our environment now and in the future.

HAT offers a strong extended or lifetime warranty. As a company, we take care to design, manufacture, and sell products that are built to last.

Product Disposal

Disposal of Human Active Technologies product as Human Active Technologies customers often ask us how our products can be disposed or scrapped we have prepared this guide that enables a classification to different waste fractions for recycling or combustion. Guide We recommend our products to be disassembled as much as possible and divided into different waste groups for recycling or combustion. For example, waste can be sorted into metals, plastics, cable scrap, combustible material, and recoverable resources. Some of these main groups can be further divided into subgroups; e.g. metal can be divided into steel/aluminum/copper and plastic can be divided into ABS/PA/PE/PP.
